Best British Aloe Vera by far

Give them a little extra and add value

Since 2012 Aloeride has helped horses thrive by adding **one unique ingredient** to daily feed that helps all of the below at the same time:

- Healthier digestive tract health and function
- Healthier hoof growth
- Natural reduction of the heating up of soft tissue
- Faster post-exercise (injury) recovery
- Nutritional support for the immune system
- Increase of natural coat shine and skin health
- Grows and restores optimum condition and topline
- Increase your chance of a better hammer price at auction
- Proven better and eminently more affordable than other aloe vera products

We hope that you will become
as excited about the Aloeride
as we are.

Thoroughbred Trainer main benefits:

- Increases condition in horses that fail to thrive
- Proven natural boost to digestive health and function
- Stronger, healthier hooves
- Faster recovery

Thoroughbred Owner & Breeder main benefits:

- Reduces the risk of illness in and injury to foals with our unique spectrum of (micro)nutrients
- Increase likelihood of a healthier foal via optimum nutrition to sire and dam
- Pre-sales conditioning

Ring us on 01858 464550, so we may give you the best price for your organisation.

SPEED, STAMINA AND RECOVERY

In preparation for important engagements, **condition** is helped greatly by daily Aloeride. Beyond **digestive** comfort improving uptake of the nutrients within regular feed, Aloeride delivers a **unique spectrum** of **nutrients** not found or not abundant even in specialist horse feeds.

Aloeride **shortens the recovery** time after training or competition or injury. An abundance of key nutrients in their natural ratios works best every time.

"Every production batch is NOPS tested at HFL in Newmarket as part of our ongoing Quality Control."

NO HOOF, NO HORSE

Thoroughbreds are notorious for having hoof problems. The cleverest training or the best fed condition comes off the rails when hooves and feet fail to connect power and stamina to the turf...

Aloeride encourages **exceptionally healthy hoof growth** and, in contrast to hoof supplements, delivers many health and performance advantages beyond hooves and feet.

"Aloeride has been essential in managing his hoof wall separation. It's not just his feet issue, we have not needed to call the vet for anything other than routine vaccinations, teeth, etc. in the 4 years we have owned him."

STRONGER DIGESTION

"A lack of appetite, poor weight gain, a dull staring coat, mild bouts of colic, often around feeding time, and a general change in demeanour where the horse appears to be 'sour' and slightly 'dull' at exercise.

Such signs often increase in tandem with increasing amounts of galloping times but, up to 90% of racehorses in training show **some degree of gastric ulceration**. This affects at least some of the horses which carry it and does impact directly on their facility to show their true level of ability." **Feeding Aloeride daily can make an immense difference** by supporting the mucosal lining and digestion.

"To a healthy digestive tract, a parasite
meets its Maker thanks to

MICROBIOME DEFENCE

The healthier you feed a gut, the more diverse and abundant its microbiome can become, the more inhospitable the gut will be to parasites.

Continuous supplementation with Aloeride can reduce egg count significantly and, by inference, reduce the need for licensed wormers. Aloeride feeds **healthy, natural gut inhospitality**; it builds innate strength as more nutrients go into the horse and less toxin disruption occurs.

e (egg) is little more than motile protein, destined to hydrochloric acid, pepsin, gastric lipase and proteases."

FEEDING SUCCESS

Aloeride is very proud to supply Britain's top **breeding** operations, with the standing rosters of stallions in big demand with endorsements from Britain, Ireland and France.

Stallions look stunning, dams receiving optimum nutrition produce healthier foals and enjoy less complicated births. Problems in the young TB have clear associations with subsequent performance and this may be avoidable with servings of clever nutrients.

As a **fully-natural-ratio supplement**, Aloeride is very palatable and easy to feed, ideal for spelling to rebuild body protein, mineral and vitamin reserves which may become depleted during training.

BREEDING

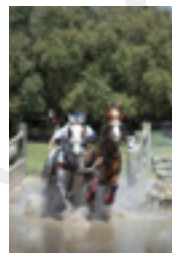

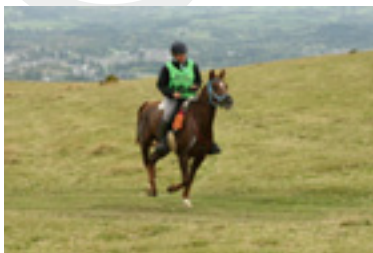

Breed and feed success. Thoroughbred Owners and Breeders take Nature's bloodlines to Nurture and then to Training. 69% of foals have at least one veterinary problem during their early years, almost 50% of foals do not reach flat race training in the UK. Aloeride changed the fortune for quite a few horses which proved financially advantageous for their owners.

What if we could help change yours?

Yorton Farm: "@Aloeride couldn't recommend it enough all our stallions are on it and look fantastic great stuff."

Warren Greatrex Racing: "@YortonFarm your stallions all look in terrific nick!! A credit to all your hard work!! #topteam"

Beyond flat racing and jump racing, Aloeride is used in Eventing, Endurance and Carriage Driving competition. Common ground is the requirement for strength, cardiovascular and respiratory fitness, lactic acid tolerance, management of recovery and competition interval timing.

"Customer satisfaction is at the heart of our business values and long term relationships is how we thrive.

Contact us today and find out how you can feed the difference."
